

PRODUCT DATA

BIO 2000

NON-BUTYL BIO 2000 IS AN EXCELLENT REPLACEMENT FOR TOXIC CLEANERS AND THOSE CONTAINING BUTYL CELLOSOLVE.

BIO 2000 is a powerful blend of detergents, emulsifiers and wetting agents, formulated to penetrate and loosen the heaviest soils and then keep them in solution for easy removal. **BIO 2000** maintains a high alkaline pH making it particularly effective on greasy dirt.

BIO 2000 may be used with pressure washing equipment or steam cleaners for the toughest cleaning jobs, such as degreasing machinery, heavy equipment, engines, hoods and vents. Adjust the strength and apply with a mop, sponge or spray applicator to clean concrete floors, vinyl and ceramic tile, counter tops, whitewall tires, vinyl tops and mats.

Safe for use on most water washable surfaces including ceramic tile, Formica, porcelain, brick, concrete, painted metal, plastic, vinyl tile, vinyl upholstery, etc. Not for use on polished aluminum surfaces, or glass.

Easy-to-use. BIO 2000, dissolves soil on contact. Apply to surface and wipe clean. Costly man-hours are greatly reduced by eliminating the need for scrubbing and rinsing.

Highly concentrated dilutions of just 1 to 20 - 40 parts of water are effective for most cleaning tasks. **BIO 2000** is free rinsing leaves no dulling film or soil attracting residues.

**Refer to the Material Safety Data Sheet for safety information.
FOR INDUSTRIAL and INSTITUTIONAL USE ONLY.**
