

## PRODUCT DATA

# MURIATIC ACID

HEAVY DUTY INDUSTRIAL CONCENTRATE

*DANGER! EXTREMELY CORROSIVE*

**Muriatic Acid** is for professional use only and must be used with extreme caution!!

If you consider using muriatic acid, please heed all safety recommendations on the product's label.

Its reactive power makes it the chemical of choice for cleaning of stained and slow flowing urinals because of urinal salt and calcium build up.

Other uses include heavy-duty masonry cleaning, preparation of masonry for painting or sealing, removal of efflorescence or mineral deposits and pH reduction in swimming pools.

**DO NOT MIX BLEACH OR TSP WITH ANY ACID!!** A violent reaction can occur with the release of a noxious, poisonous gas.

You can use this product, but it must be used separately with thorough rinsing with water between applications.

Contact with the eyes, can cause irreversible damage and permanent blindness. Contact with the skin can cause severe burns.

**IMPORTANT: Always add acid to water... never add water to acid!!**

Refer to the Material Safety Data Sheet for safety information.  
FOR INDUSTRIAL and INSTITUTIONAL USE ONLY.
