

ATTRACT

Water Based Dust Mop Treatment
NON FLAMMABLE

ATTRACT is a special water-based formulation for treating dust mops and cloths.

ATTRACT may be safely used on asphalt, vinyl, asbestos, linoleum, terrazzo, marble, ceramic tile, sealed wood and concrete floors.

ATTRACT will quickly penetrate dust mops and cloths, providing extended dust- and dirt-retention capabilities.

ATTRACT is 100% compatible with all modern floor-finishing materials including acrylics, metal-interlock finishes, and water-and-solvent-based wood and concrete floor finishes.

ATTRACT prevents problems such as mottling, or adhesion problems with floor coatings that oil based treatments cause.

ATTRACT and soils can be easily removed from dry mops and cloths simply by washing with detergent and water.

ATTRACT is nontoxic, nonflammable, noncorrosive, and biodegradable.

Refer to the Label and Material Safety Data Sheet for use and safety information.

FOR INDUSTRIAL and INSTITUTIONAL USE ONLY.
